Care for Your Product

CARE FOR YOUR PRODUCT

Resin/wood is tough and hard to break, it will yellow over time, however some precautions are necessary to ensure that your piece lasts you for the longest time:

- * Best cleaned with a soft cloth or water and mild soap if needed. Wipe dry after cleaning.
- * Do not use chemical cleaners and products such as household cleaners, nail polish remover and other similar items.
- * Avoid exposure to high heat and it is best to avoid leaving your piece sitting in the sun for extended periods of time.
- * Foods that are hot are best not to be placed on the designed area.
- * Resin can scratch, do not cut on the design area, do not use abrasive cleaners and drag on highly abrasive surfaces.
- * Do not pick at the edges to lift the resin seal, it can cause water to enter your design.
- * Oil your board as often as you wish using a food safe oil. Do not oil the patterned area or to the back of it as oil can seep into your pattern causing discolouration.
- * Not dishwasher safe.
